Fadly is a Computer engineering graduate, who always expand experiences and full of curiosity. A well-rounded person who want to kickstart his career in a product management role.

About mekari

Mekari Flex:

Mekari is a leading Software-as-a-Service (SaaS) company in Indonesia, offers a cloud-based platform serving as an operating system for businesses. One of Mekari's offerings is Mekari Flex, an employee super app that aims to enhance the wellbeing of employees. Mekari Flex acquires its users, who are employees, through the B2B2E strategy, in which the Flex team works to persuade HR or business owners to implement the technology within their organizations.

2 Pillars:

- *Flexible Benefit Scheme*

Coming **from employers' cash flow** to provide benefits with **Flexible Employee Benefit Strategy** access, which mostly was previously only available for large companies. However, this will be a valuable tool for HR/Business Owners to use in managing their employee benefits.

- *Accessible Salary Scheme*

Instead of using their own cash flow, the employer can **offer their employees** the option to **access their salary before payday**. This will allow the employees to receive their salary earlier, and the amount will be deducted during payroll later on. This option provides convenience for the employees.

5Gs Great Legacy:

- *Great Experience*
Excellent HR service, facilitations, and fundamentals
- *Great Engagement*
Great working together with the company
- *Great Success*
Grow career and success with the company
- *Great Excitement*
Feels good working in the company
- *Great Workplace*
Go further with the company

Goal in Hack The Product:

Mekari Flex is looking to expand its offerings by adding **two new key products** that **focus on financial services** and also have the potential to **enhance employee retention and satisfaction** through employee benefits.

User Persona (B2B2E)

Apiary
Academy

mekari

Name : Liana
Location : Grogol, Jakarta
Age : 35 years old
Status : Married
Occupation : HR Manager

Testimony

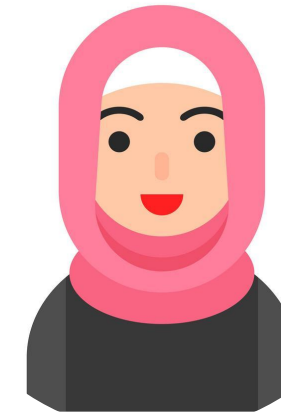

"Saya dapet laporan dari bos saya. Beliau suka khawatir dengan pegawai karena pegawai tuh suka minjem-minjem uang ke sesama pegawai. Kalau tidak dipinjamkan, mereka lalu menggunakan pinjol online, kadang yang resmi kadang yang ilegal. Kalau nggak dibayar akhirnya nelson ke kantor. Jadi saya diminta untuk mencari solusi yang aman dan mudah digunakan untuk perusahaan"

Goals

- To **provide** better alternative for employee financial problems
- To feel more **safe and secure** about employee financial healthiness
- To improve **employee overall happiness**

Pain Points

- There are employees who use **legal and illegal online loans**, who ends up having debt collectors contacting the company because of their inability to pay
- A part of employee actually doing borrowing money from each other and feels **insecure** in doing so, which ends up **affecting their performance**

Name : Mawar
Location : Cisauk, Tangerang
Age : 29 years old
Status : Married
Occupation : Employee

Testimony

"Saya suka banget arisan sama teman-teman kantor, karena uangnya lumayan buat nambahin ini itu, ibaratnya kayak gaji ke 14 gitu loh. Apalagi kan saya juga mikir jangka panjang ya, nanti kalo pengeluaran nambah gimana? Belum juga mikirin pensiun di masa tua nanti, saya sama suami punya tabungan nggak? Apa BPJS aja cukup buat hari tua nanti? Ingin deh rencana pensiun diurusin perusahaan"

Goals

- To have **better financial planning**, especially on retirement
- To have **another source of income** besides salary

Pain Points

- There are needs to **earn** more income to cover many expenses
- **Insecurity** regarding financial wellness and **future** financial conditions

Empathy Mapping

Customer Journey Map

Apiary
Academy

Objective : To alleviate financial assistance for employees in a timely and efficient manner without adding additional stress or burden to their lives

Scenario : A company that was previously unaware of Mekari, then recently completed a deal with the company, and now expects its employees to use Mekari's services

User Persona : Company that is interested in offering employee benefits and employees who are in search of a company that provides financial services

User Journey	Awareness	Consideration	Decision	Exploration	Solution
Action (B2B) Company	Saw Mekari advertising	- Comparing “Mekari Flex” features and offers by demo - Get Advice from employees for their needs	Company decide to choose Mekari Flex and close the deal	Open “Mekari Flex” homepage and start exploring features and benefits	- Simplifying employees benefit administrative - Provide better employee loyalty and satisfaction
Touch Point (B2B) Company	- Ads - Email - Word of mouth	- Product demo - other competitor’s demo - Employee	Contract Sign	Homepage “Mekari Flex” with “Flex Benefits”, “Flex Installments”, “Early Wage Access” features	“Mekari Flex” App
Action (B2E) Employee	Heard people’s recommendation about Mekari	Direct order from company to use Mekari	Workshop how to use Mekari Flex (implementation stage)	Open “Mekari Flex” homepage and start exploring features	Receiving and enjoying the benefits
Touch Point (B2E) Employee	- Word of mouth - Digital and offline ads	- Company - Word of mouth	“Mekari Flex” App - Video conference	Homepage “Mekari Flex” with features	“Mekari Flex” App
Needs/Pain Points Company (B2B)	Needs to provide better financial solutions for employees	- There are some companies who provides similar features - Employee confused which solutions are better	- HR management software - Salary software - Bigger employee benefit	- More features - Hassle administrative - Company regulation-fit - Company brand-fit	- Limited partner - Unable to suggest merchant or benefit partners to mekari
Needs/Pain Points Employee (B2E)	Needs to have access better financial solutions	Employees are facing uncertainties in regards of financial management	Cannot vote or advice about using Mekari or not	More features to help employees since benefit is only dedicated for personal use, while the employee wants to extend it for other use	Benefit only for lifestyle needs, while not helping more into financial issue
Opportunity	- Online tutorial and guidelines how to use the Mekari Flex - Startup and tech review	- Financial management - Retirement plan	- Integration services - Financial management - Quality of life improvement	- Earned Wage Access feature - Installment feature - Flex benefit feature - Retirement plan feature “Arisan” Feature	- Open for merchant suggestion - Customer feedback - More partner for “Mekari Flex”

Research Findings

Graphic Shift issue:

According to the research from [Deloitte](#), the percentage of **millennials workers in Indonesia is the largest (33.75%)**, followed by Generation Z (29.23%), Generation X (25.74%), and the smallest percentage is made up of baby boomers and veterans (11.27%). This trend can be observed in companies such as PT Astra International and [PT Bank Negara Indonesia](#), which have a workforce that is predominantly composed of millennials employees, with a percentage reaching around 70%.

Employee culture & performance (HR/Business Owner POV) issue :

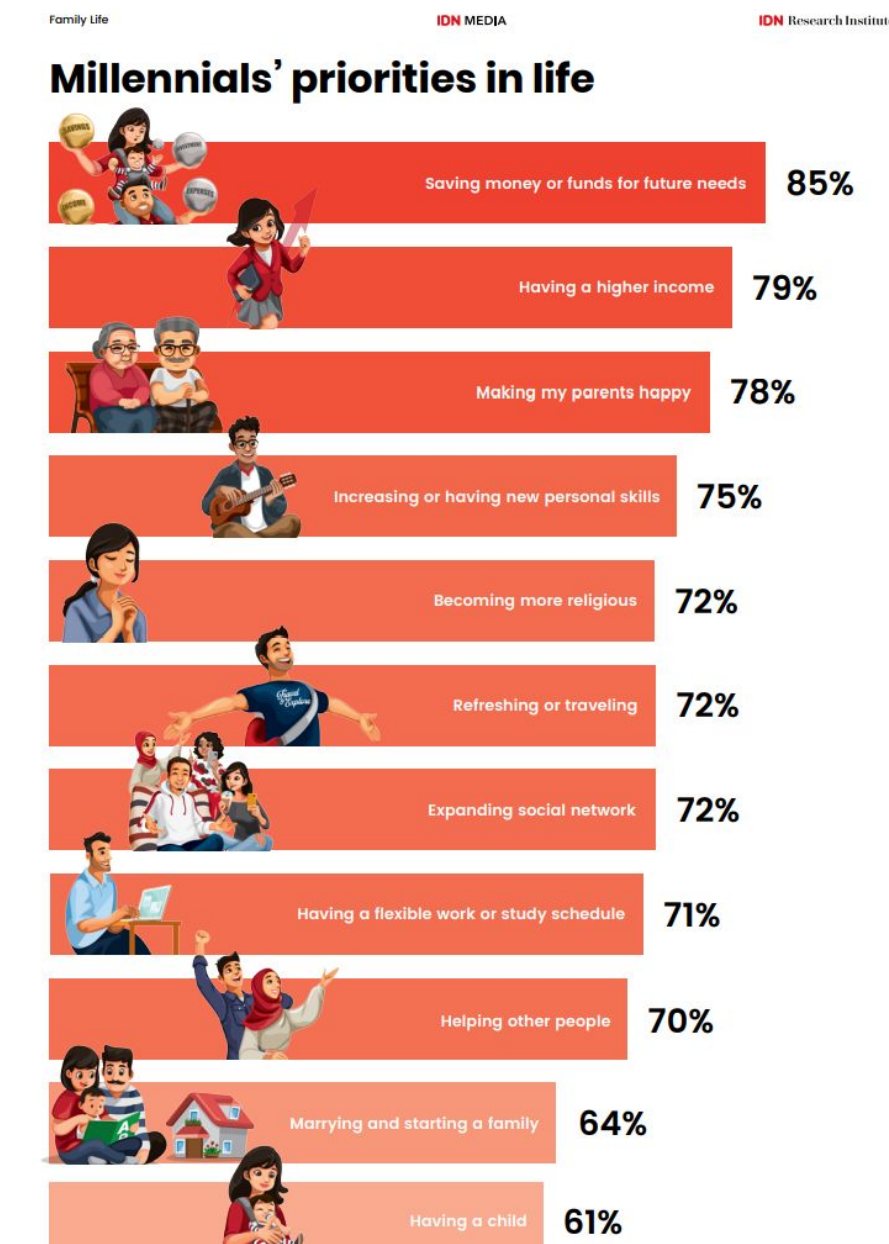

As the HR manager of a company, Liana has received various complaints and reports regarding employee activities related to financials such as **borrowing from friends and online loans**, which makes her worried since it directly **impact the employee's performance**.

Financial Uncertainties (Employee) issue:

As an employee and a sandwich generation, Mawar feels **insecure about her future**. Since she has a parent and a child to support and only earn average salary, saving for retirement becomes more difficult for her and her average salary does not help.

Sandwich Generation issue:

The [Indonesia Millennial Report 2022](#) shows that the number of “sandwich generation” that experienced by the millennials has increased by 33.82% from 2021 to 2020. These millennials have the added **responsibility of caring for both their parents and their children**, and sometimes even extended family members, while also trying to maintain a balanced lifestyle.

Problem Statement

Academy

mekari

B2B

B2E

I am

Company HR manager

Liana. 35 years old. HR manager of a company

I am

Employee

Mawar. 29 years old. Employee of a company

I am trying to

Provide better for employee financial problems.

Looking for potential corporate partners that helps solved his employees financial problems and easy to use.

I am trying to

Look for better alternative for my financial problems

Looking for potential financial solutions, both inside and outside of company

But

Not able to find any potential solutions

There are solutions that similar with online loan and paylater

But

Not able to find any potential solutions

Most solutions comes unofficially by her friends and relatives, which not long lasting

Because

The solution is not yet exist

There are few companies that provides secure and integrated holistic function

Because

The solution is not yet exist

Her company does not provides secure and integrated holistic function

Which makes me feel

- Puzzled
- Hesitant
- Concerned

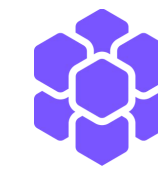

Because of the insecurities of existing solutions might not be fit for his employees.

Which makes me feel

- Contemplated
- Worried
- Overwhelming

Most of existing solutions might not be fit for her and if there is a solution, it is not officially provided.

Flex-Retire

Proposed concept:

Adopting the idea of 401k from the States, a tax-advantaged retirement account offered by many employers. Approach 1: **Company & Employee Pocket** – Employees can contribute a certain amount of money and their employers will match a portion of that contribution. Approach 2: **Only Employee Pocket** – Employees can chip in and hop on to company's investment fund.

Both approach will boost the retirement savings, also reduces the tax burden for employees as they only need to pay income tax on the amount that has been deducted for investment. Tax will only be due when the employee decides to cash out their savings.

Risks possibility:

- The investment may **potentially result in profit or loss**
- Employees may **file a lawsuit** against the company for improper management of investments
- The company may have **undisclosed motives** and may **misuse the funds** gathered from employees

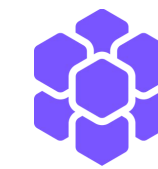

How to reduce risks:

- The company can only invest in **publicly visible investments** and cannot use the money for operational costs
- Employees must **sign an agreement** acknowledging the potential for loss and the company should share their investing strategy on a quarterly basis
- Investment withdrawal is only permitted for **full-time employees** after they have left the company

Benefit of Flex-Retire:

- **Bigger investment profit** *[Employers & Employees]*
By investing a larger amount of money, you stand to earn bigger profits when your investments perform well. This way, you'll see a more substantial overall return on your investment.
- **Reduce tax** *[Employees]*
Minimize your tax burden while preparing for retirement by only paying taxes when you sell your investments. Additionally, the income tax you pay will be lower because a portion of the money is being invested.
- **More retirement investment option** *[Employees]*
Investing can be intimidating for those who are not well-versed in the subject. By partnering with a trusted and experienced investment company, individuals can feel more secure in their investment choices.
- **Ease-of-mind** *[Employees]*
Having ease of mind in retirement planning can help to reduce stress and anxiety about the future and allow the individual to enjoy their retirement with confidence and peace of mind. The product is being observed by the OJK (Indonesia Financial Services Authority)

Flex-Retire

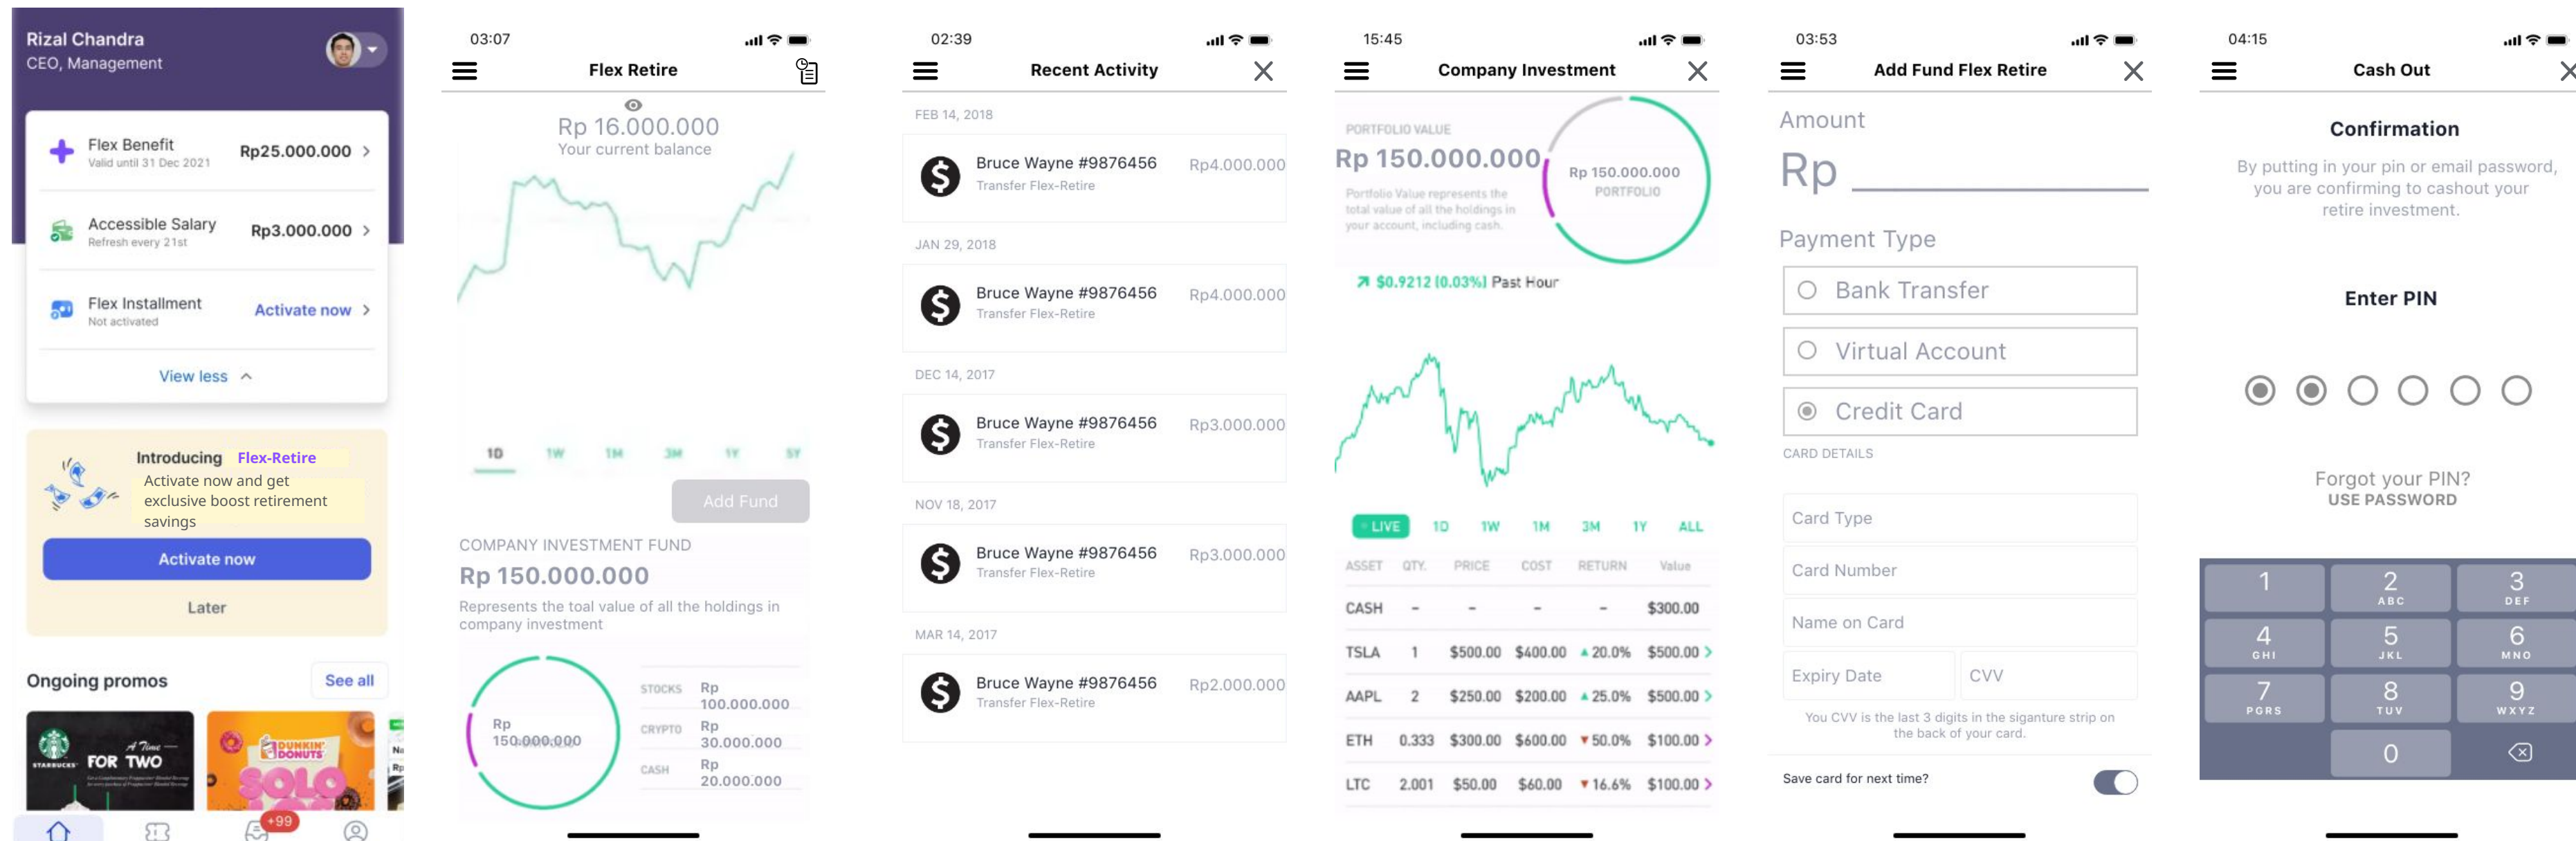

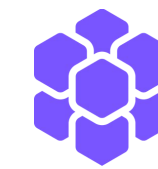

MVP:

- Flex-Retire homepage: Employee's investment growth report
- Recent activity page: Dates and investment amount history
- Portfolio page: Approach 1 – Show employee investment portfolio, Approach 2 – Show company investment portfolio
- Cash-In page: Payment/transfer money to invest
- Cash-Out page: Enter pin for confirmation to cashout

Feature opportunity:

- Employee can suggest what to invest
- Company can do polling for their investment option to see their employees preference to invest
- Can cashout the retire investment anytime

Proposed concept:

Adopting the idea of “arisan” about social togetherness culture in Indonesia. A group of people contribute a regular amount of money to a pool, which is typically held on a monthly basis. Through a lottery, one person's name is selected to receive the funds. If they are lucky, they will receive the funds immediately. However, if others in the group need the funds, they can bid for them, and the highest bidder will be chosen. Eventually, each person will have a chance to win the funds, making it a type of investment.

Risks possibility:

- Some participants may not be able to continue and may choose to withdraw
- Some participants may struggle to pay on time

How to reduce risk:

- Have the product be observed by the OJK (Indonesia Financial Services Authority)
- Limit participation to full-time employees only
- Have the bidding fund be held by the treasurer to manage potential risks
- If one of them is unable to make further payments or fulfill their commitment, but has already received the funds, their salary will be automatically deducted

Benefit of Flex-Gæther:

- ***Social bonding*** *[Employers & Employees]*
Strengthen the culture of togetherness to increase trust, collaboration, and overall job satisfaction. It can help to improve communication and reduce conflict.
- ***Financial help*** *[Employees]*
Company that offers financial assistance can help employees' overall well-being and lead to job satisfaction. It improves the lives of employees by providing support and resources that can help them to achieve their goals and aspirations.
- ***Secure*** *[Employees]*
All participants in this group are employees of the company, ensuring that everyone's job is secure and that no outsiders are included in the group.
- ***Positive overall company branding*** *[Employers]*
Company will have better positive image toward employee and communities, where they will continuously attract goodwill and talented future employees.

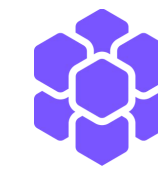

Mekari Great Legacy:

Great Experience

Great Engagement

Great Excitement

Flex-Gæther

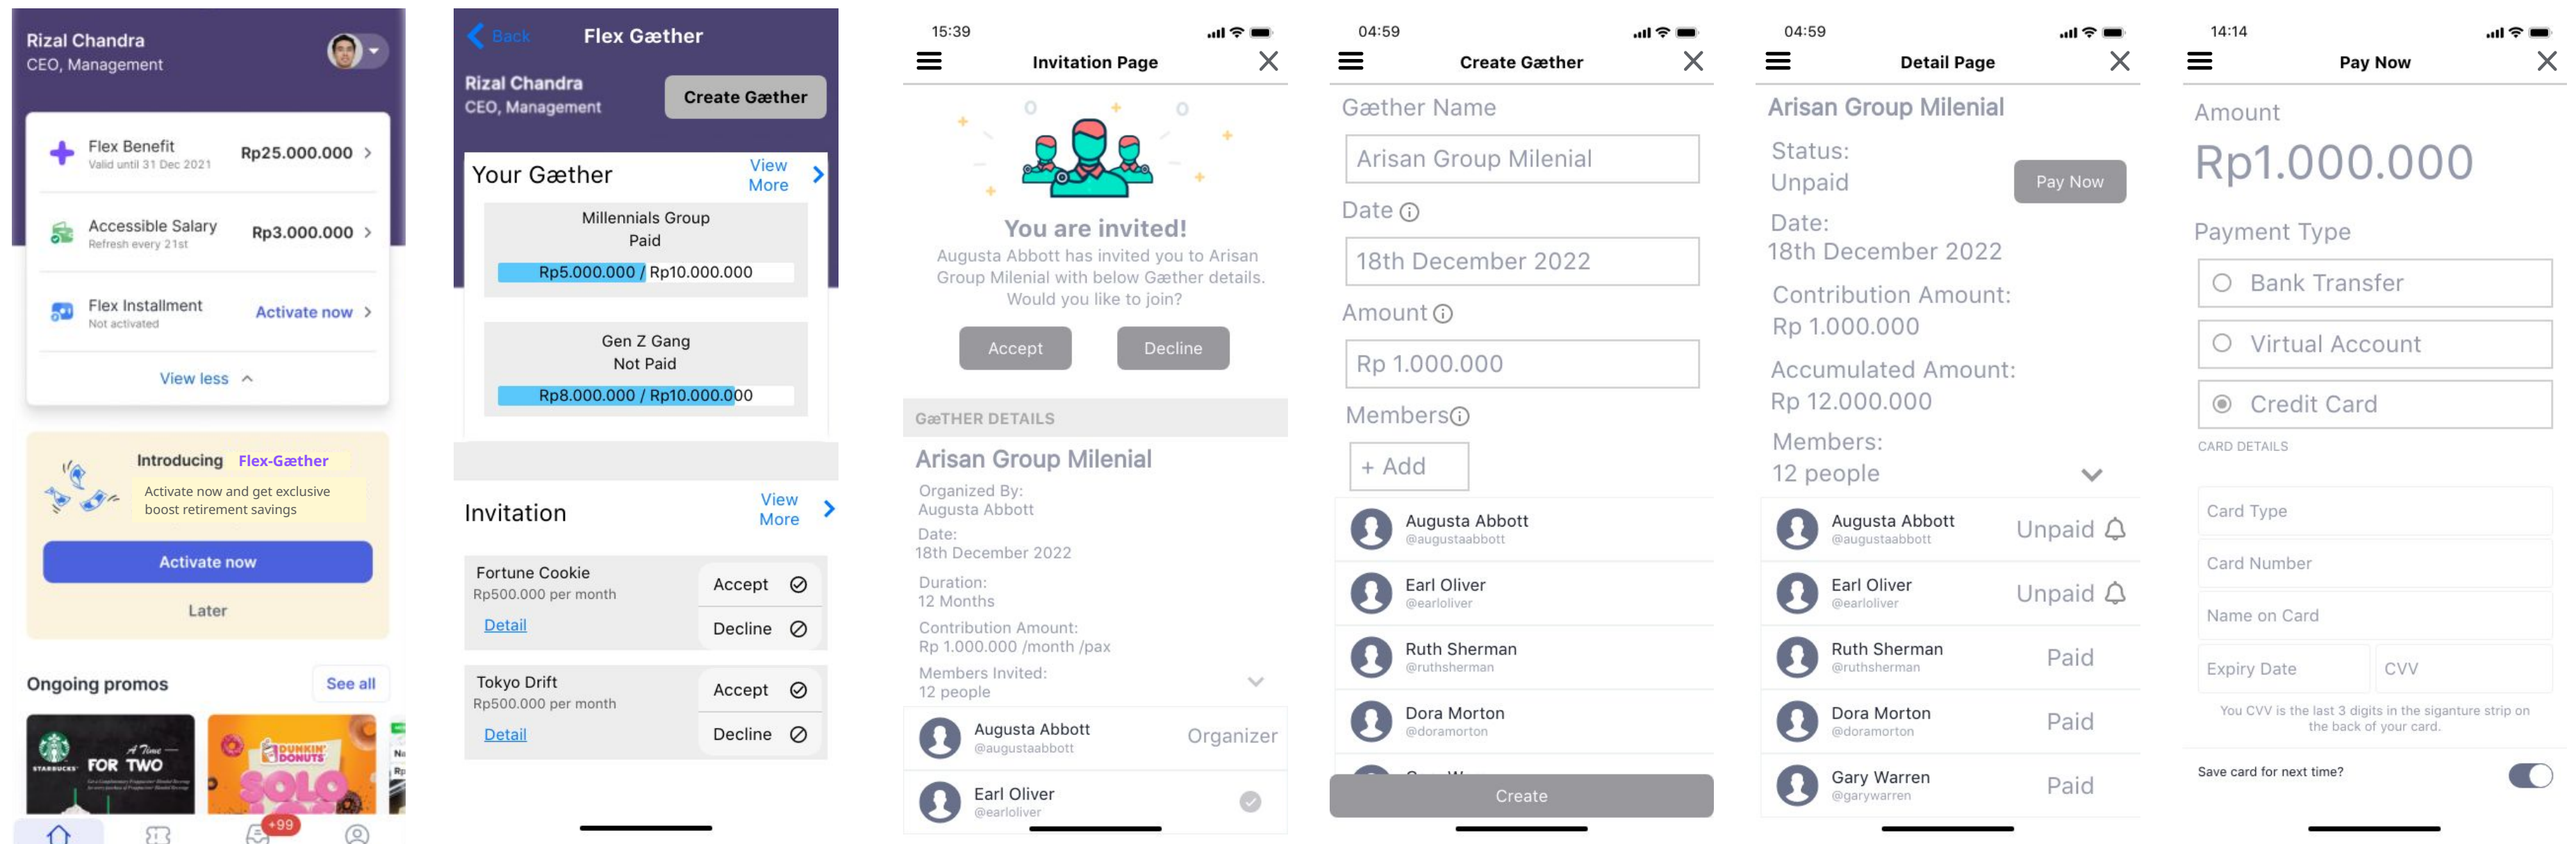

MVP:

- Flex-Gæther homepage: Employee's *arisan* list
- Create page: Condition group created (min 6 pax, up to 12 pax, max 5 project to be participated)
- Group detail page: List of member paid/due, received/waiting
- Invitation page: Join or reject the invitation
- Contribute page: Payment flow to contribute in the *arisan*
- Notification page: Reminder to pay on time

Feature opportunity:

- Unlimited people can join
- New joiners can join anytime
- Several period of time option (weekly, monthly)
- Several type to chip in (money IDR/SGD/USD, gold, bitcoin)
- People can bid to get the money (with interest)
- Not only for personal use, for donation / event / occasion
