Company Profile

About RedDoorz

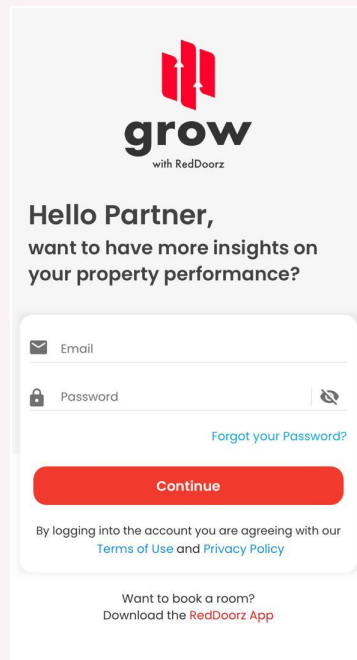

Launch in October 2015, RedDoorz is a leading hotel and hospitality management in Indonesia.

RedDoorz provides standardized existing budget hotels and currently managed around 1.500+ properties across 4 countries including Indonesia, Singapore, Vietnam, and Thailand.

Properties who partner with RedDoorz benefit from the company's business development and hotel management professionals and gain access to different marketing channels, increasing the potential for growth.

As part of RedDoorz' online booking platform, partners increase their property visibility not just in the country but all over the world. Property reviews within the site and in all its other channels help in generating interest and gaining credibility for its offerings. The company is also able to manage demand and optimize pricing through its network of hotels to maximize revenue potential.

Problem Statement

I am	• Non tech savvy • Property Owner	Effendi. 48 years old. Property owner and partner of RedDoorz who rent his property for a living.
I am trying to	Find out information of guest booking profile and background checks	Looking for his potential guests' background for more safety measurement and preparation time.
But	Not able to find any informations	There is no information about the guest booking behaviour at all provided by RedDoorz.
Because	The feature is not yet exist	He explored the app, from dashboard and everywhere but cannot find any information regarding his future guests.
Which makes me feel	• Anxious, insecure • Disappointed • Frustrated	Anxious, disappointed, and frustrated because of the insecurities of his potential guest might not be a good guest.

User Persona

About

Mr. Effendi is a property owner lives in Cikoya, Tangerang. He owns several guest houses that he wants to monetize and been using RedDoorz since 2017 to rent his properties to earn extra income. He is not so tech savvy person yet has high user experience expectation from RedDoorz in maintaining hotels together business exposure.

Goals

- To feel more safe and secure when accepting guests
- To contribute by giving reviews and informations about guest to other owners that use Grow with RedDoorz app.

Pain Points

- Having a new guest is like a gamble, never know will have a pleasant experience or not
- Trying to seek help from RedDoorz but then not so sure what can RedDoorz able to help

Testimony

"Saya tuh suka khawatir kalo ada orang yang pesen pake RedDoorz, soalnya harganya murah jadi suka takut aja gitu, takut tamu ada yang aneh - aneh.

Kemaren tetangga saya abis diperiksa polisi, katanya ruko sewaan nya dijadiin transaksi narkoba dan praktek prostitusi.

Saya kan jadi takut atuh, kalo yang begituan nimp a saya gimana? Ayo dong tim RedDoorz bantu :("

Empathy Mapping

Says

"I cannot do background check of my guests"

"I want to review my guests for their behaviors"

Thinks

"This guest is rude, is there a way to inform other property owners?"

"RedDoorz should facilitate direct review from owners to guest"

Mr. Effendi

Does

Contacting customer service

Ranting on social media

	Outside The App	Inside The App			
User Journey	Verified RedDoorz Partner	Log-In	Dashboard	Check-In	Check-Out
Touch Point	RedDoorz partnership and start training (learn how to use “Grow with RedDoorz”)	Open "Grow With RedDoorz" app and start app account verifications	Open “Grow With Reddoorz” homepage and start exploring features	Accessing "Grow with RedDoorz" check-in page	Notification of guest check out and payment page
Feeling	😞	😞	😞	😞	😞
User Needs or Paint Points	• Need to track consumers behaviour and review	• Login fast • Login with options • Safe login, not anyone can open	• Need to monitor revenue summary • Property reviews • Read customer's profile	• No early warnings from RedDoorz if the customer is blacklisted • Need to do booking history check	• No rating feature for my customer with their behaviour during their stay
Opportunity	• Online tutorial and guide how to use the Grow with RedDoorz	• Multiple login options • Face id and insert pin feature for safety • Automatic logout when unattended	• Reviews & ratings management feature	• Accept or reject customer feature • Guest's booking history • Guests handling recommendation feature	• Owner review and rating for customer feature

Solution

Guest's Booking Approval Option

Context:

While maintaining guest's booking, business owners received a booking order via RedDoorz. Hotel operators should have proceed with the booking and provide the room accordingly, business as usual.

Issue occurred:

- There is no record of the guest if they are new or existing guest within RedDoorz hotel bookings
- Have good or bad history during stay
- Just accepting guests without any warnings gives the anxiety of the business owners
- It does not give the owners an option to make a decision in accepting or rejecting the booking

Solution:

By providing a guest overview can give the owners values to consider in accepting or rejecting the guests appropriately.

Guest Photo Guest Name Male Rate: 4.7 ★ Approve guest's booking? Accept Reject Guest Overview Date : 18 September 2022 Venue : Hotel A Rating : ★★★★★ Comment: Very nice guest!	Guest Name Rate: 4.7 ★ Guest Overview Date : 18 September 2022 Venue : Hotel A Rating : ★★★★★ Comment: Very nice guest! Date : 10 September 2022 Venue : Hotel B Rating : ★★★★★ Comment: The guest help to rate our hotel!

Solution

Guest Handling Recommendation

Context:

Based on the guest overview, this is where RedDoorz can provide information about guest's history booking in terms of their preference as well. Such as, bed/room type, longer stay, number of guests in one room, additional facility, high/mid/low floor, etc.

Issue occurred:

- Currently the business owners received a very limited information about the guests preference
- It is limiting the hotel owners to give additional complimentary to boost the guest staying experience
- There is no personalization touch between hotel and guests needs (just in case the facility did not match with the guest's wanted)

Solution:

Personalization is key in dealing with guests. RedDoorz should be able to provide guest handling recommendations for hotel owners. It will boost the quality service and reduce unpleasant experience.

Guest Name
Rate: 4.7 ★

Recommended notes:
Handle with care, as for punctual of the available room is important for the guest. If possible provide water bottles during stay for complimentary.

Solution

Provide Guest Ratings

Context:

At the end of the stay and checking out, the engagement between business owners and RedDoorz should not end just like that. Instead, to maintain the service quality and other RedDoorz partners to stay accountable, there should be a feature of guest ratings.

Issue occurred:

- There is no tools or feature for the business owners to give review or rate the guests while they were staying in the hotel
- There is no available information of the guest to be shared for other RedDoorz partners in handling the guests

Solution:

Provide guest ratings features where business owners can give their review as well that can be seen for other RedDoorz partners while deciding to accept the guest or not. The idea is similar with the current guest review and rating for hotels, but in this Grow with RedDoorz it works other way round.

A mockup of a guest rating form on a mobile device. The form is white with rounded corners and a thin black border. At the top, there is a circular placeholder for a 'Guest Photo' with the text 'Guest Photo' inside. Below this is a label 'Guest Name'. The main section of the form is titled 'How was the guest?' with a subtitle '(1 is disappointing, 5 is awesome)'. Below the title are five empty star icons for rating. At the bottom, there is a text input area with the prompt 'Please tell us your review about this guest during their stay with you.' and a character count '400/400'.

Guest Photo

Guest Name

How was the guest?
(1 is disappointing, 5 is awesome)

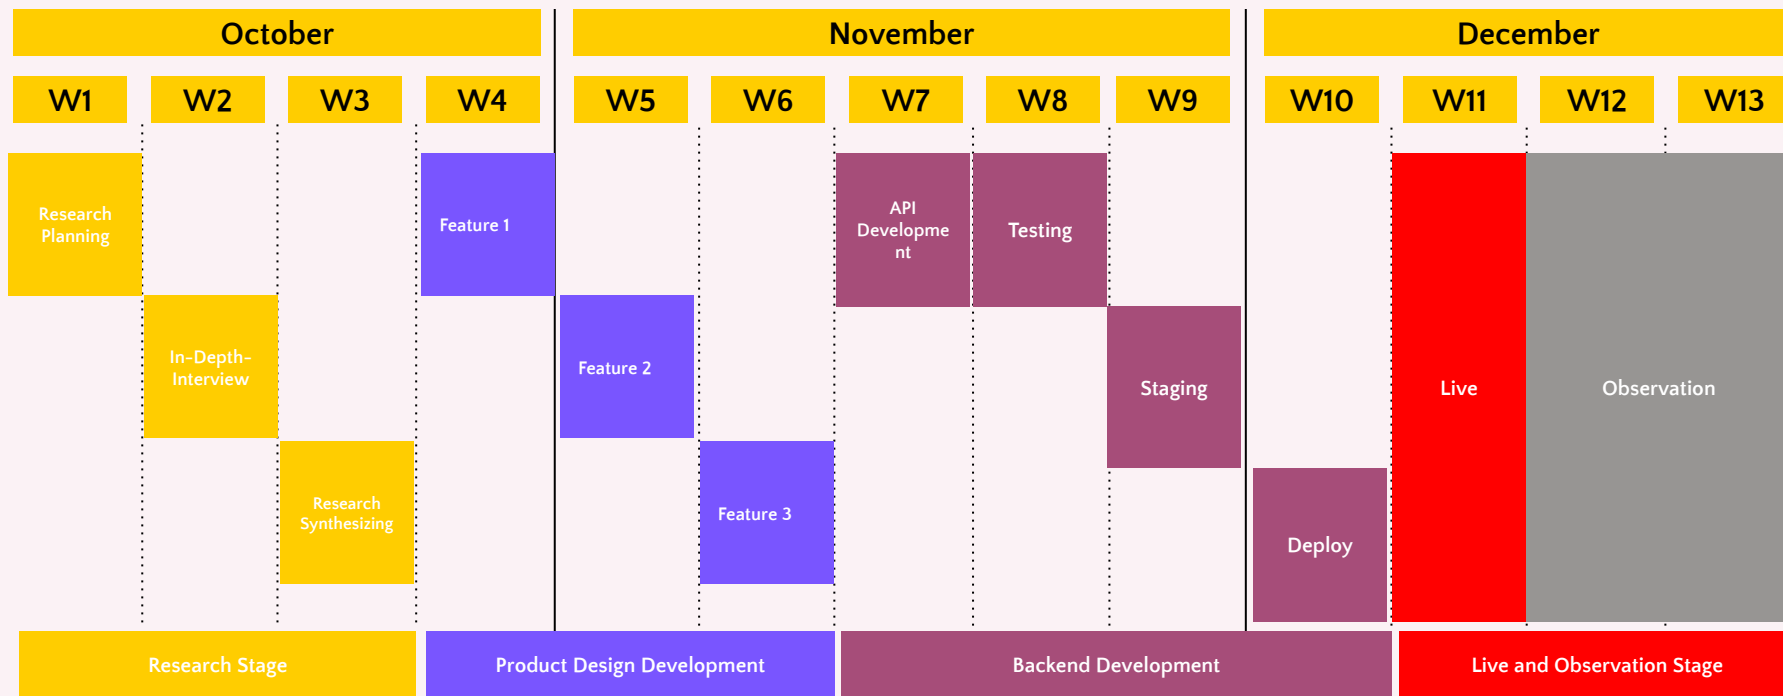

☆ ☆ ☆ ☆ ☆

Please tell us your review about this guest during their stay with you.

Give us your review. 400/400

Week 10: Preparing for Go-Live

Week 11: Live for public use

Week 12 – 13: Observation is taking place for feedbacks and further developments

Go-to market and communication plan

Summary

Problem	Solution	Key Result
There is a limitation given to the business owners from RedDoorz once booking order is issued. RedDoorz partners should have the ability to approve or reject the booking order when they see the guests or situations are unfit.	Adding a “Guest’s Booking Approval” options	• Reduced partner churn rate and increase positive word-of-mouth and referrals. • Reduce number of guest who possibly do an illegal activities
Business owners need help from RedDoorz to boost the quality service and reduce unpleasant experience, which resulting in a lack of personalization touch between hotel and guests needs, because of the limitation of guest’s preference information .	Adding “Guest’s Handling Recommendation” notes	• Rich information of the guests will bring the quality service to stay on top. • A sense of being protected and supported by RedDoorz through recommendations.
Guests with bad or good behaviour cannot be tracked by RedDoorz partners, impacting the reputation of the property itself and potentially reduced room occupancy rate .	Provide “Guest Ratings” feature	• Provide review about guest and their bookings • Preserving the business sustainability since it helps preventing unwanted problems that might impact the occupancy rate
Next Opportunity Development		
Grow with RedDoorz app seamless experience for business owners: • Multiple login options, including face id and pin for safety measure • Online tutorial and guideline book on how to use the “Grow with RedDoorz” app • Light CRM feature • Website based
