Preface

About Julo:

Julo's name is derived from Sumatera, where "julo julo" signifies borrowing activities between investors and entrepreneurs aimed at business growth and expansion. As a financial technology company, Julo has already been downloaded over 10 million times and has 1.2 million active users across multiple platforms.

Goal in Hack the Product:

Julo aims to transcend “beyond lending” and is currently working to expand its features to provide a comprehensive financial solution for its users.

Julo Focus Market - 'Pareto Law' (80-20 rule):

80% of the revenue is generated by 20% of the clients, making these 20% the core customers for the company.

What 'Pareto Law' means for Julo:

In line with Julo's vision of going beyond lending, it is important for the company to focus on the 20% of users who regularly use the platform, especially those who make frequent transactions. These users are the most avid and will likely be more than willing to assist with the implementation of new features as part of Julo's vision. Additionally, since these 20% of users are the most active in accessing the Julo app, their input is crucial.

User Persona

Mikha Rizky

- 29 years old / Startup Employee -

Demographic

Location : Cibubur, Depok
 Gender : Male
 Status : Single
 DISC : Compliance, Influence
 Personality : ISTJ, the Logistician

About

Bambang is an employee in one of a startup company. He earned a standard salary for his position but there are lots of things he wants to purchase such groceries, homewares, and luxury items such as sneakers and backpacks. As Julo's loyal user, he wants to contribute more to Julo other than using it to buy things and gets incentivized in doing so.

Goals

- To be able to contribute to Julo without having to borrow money
- To be able to obtain benefits from Julo while doing something fun in the process

Pain Points

- No offered benefit from Julo since he is able to pay his loan on time
- Minor insecurities about paying loans

Testimony

"Sebagai anak muda, maunya gue tuh banyak, mulai dari pemenuhan kebutuhan sehari - hari sampe barang - barang kayak tas sama sepatu.

Karenanya gw seneng banget pake Julo. Ini apps tuh mempermudah gue beli ini itu. Overall juga secara experience dan bunga baik ya, ga ada yang aneh - aneh.

Cuma gue denger dari temen gue yang telat bayar, dia ditawarkan keringanan bayar dari Julo dan jumlahnya lumayan gede. Gue mikir kira - kira kedepannya Julo ada sistem yang membuat gue dapat benefit yang mirip dengan itu ga ya? Lebih keren lagi kalo mekanismenya seru, kayak main game gitu. Kan lumayan ya gue dapat keringanan, dan disatu sisi gue jadi lebih banyak interaksi sama aplikasi Julo"

Customer Journey Map

Scenario : User of a loan app that losing motivation in using the product or services, being introduced to a new product, finding value in using the app

Objective : To address user's motivations and challenges to encourage their engagement and retention in using the loan app by providing unique value propositions and benefits that meet their needs and provide a sense of satisfaction, making the apps function beyond lending

	Decreased Motivation	Search For Alternative	Product Adoption	Engagement	Loyalty
User Journey	Start to feel unmotivated	Begins to explore other options, find a better solution to their financial challenges	Found new feature inside the app that provides the value and benefits they need	Users become active and engaged with the new feature inside the app	Become a loyal user of the app
Touch Point	User interacts with the app on a regular basis	Researches other financial apps and services online to compare	Begin to explore and educate them self how the feature works and start to use it more often	- Interacts with the app regularly - Start to understand how the product features work - Able to utilize it better	Recommend the app to others
Feeling	Uninterested and bored with the app	Uncertain and unsure about the options available	Excited and motivated to continue using the app	Confident and in control of their finances	Proud and satisfied with the progress they've made
User Needs or Pain Points	- Need to see a change in their financial habits - Feel like they're making progress	- Find a solution that offers value, benefits - Helps them make progress towards their financial goals	- Need for a solution to their financial challenges is met by the new app - Can see the value it provides	- Solution to their financial challenges should met - Interactivity should be variable	- Financial challenges has been met - They see the value in using the app long-term
Opportunity	- Providing additional value and benefits - Help users improve their financial habits	- Offer comprehensive solution - Provide support and resources for users to improve their financial habits	- Retain users by providing rewards program - Wrapped in gamification approach	- Deepen the users' engagement by providing additional value and benefits - Introduce other features	- Build brand loyalty and retention - Attract positive company images

Problem Statement

I am	• Employee • Julo user	Bambang is 29 years old and is currently employed at a startup company, with an average income.
I am trying to	Interact more with Julo apps, with possible, with little chance of getting incentivized from it	Desiring to participate in interactions with Julo apps for the purpose of obtaining benefits.
But	Not able to interact much	There are not much interaction beyond lending activities within Julo.
Because	Julo only offers loan services but lack of interaction to keep the existing user more attracted to use Julo app	After exploring the app, he realized that his options for interaction were limited to loan processes only. The app did not offer any unique or fulfilling benefits to justify continued usage.
Which makes me feel	• Disappointed • Unimpressed • Dissatisfied • Bored	He is expecting Julo to provide additional value. Offer incentives and positive experiences that will keep them motivated to continue using Julo and make them feel appreciated.

Research Findings

Research by [Adjust](#) stated that Fintech apps aim to make users' financial lives easier and more convenient; however, one of the areas where fintech apps struggle is retention—a recent report noted that 73% of new fintech app users churn within seven days. Two ways fintech apps can address this challenge are by utilizing loyalty program and gamification.

The Value of Loyalty Program:

According to [Annex Cloud](#), 68% of consumers stated that they may not remain loyal to a brand who lacks a loyalty program. Additionally, there is a 54% chance that consumers will increase their business with a company that has loyalty rewards.

The Value of Gamification:

In accordance with [Payments Journal](#), Texas bank Extraco conducted a gamified marketing campaign and saw an increase in conversion rates 2-14% as well as a 700% increase in customer acquisitions.

Based on [Snipp](#), gamification has a positive impact on businesses and marketers, with an average increase of 68% in customer online activity and a 22% increase in social sharing. Implementing a gamification strategy also reduces marketing costs by encouraging customers to share their activities and extending the reach of advertisements.

The Benefit of Loyalty Program & Gamification:

Julo – offers the advantage of gathering unique data through **progressive profiling** and fostering strong customer loyalty habits, as well as the capability of promptly **adapting to changes**. Also, introducing and educating users about existing or new products within the app serves as an **effective bridge**.

Users – gamification makes it **easier and faster to understand** the app's offerings and **avoids overwhelming** them with information. Additionally, gamification provides a **sense of accomplishment and satisfaction**, encouraging long-term engagement and helping users discover the value that the app provides.

Business Metrics & Roadmap

North Star: Number of Users Engaging with Julo

User Retention – Recurring Loan

Good : > 16%
Average : 7 - 16%
Poor : < 7%

Julo Goal: Build loan app '*Beyond Lending*'

Phase 1 – Gamified Rewards Program [CURRENT FOCUS]

- Gamification serves as a bridge and blueprint towards many possibilities including but not limited for **marketing and education purposes**
- The rewards program will act as a tool to promote **interactivity and drive retention, user acquisition, and user credit growth**

Phase 2 – Referral Program

- Gamification as a marketing program, especially in referral program where both **existing and potential new users acquired benefits** by following the programs
- The referral program is expected to play a key role in boosting awareness of Julo and driving the acquisition of **new users and communities**

Phase 3 – Financial Management

- Gamification can be utilized as a means of **educating people on financial management** and digital finance literacy, offering increased rewards EXP for users who successfully complete missions
- Users in Julo can gain **access to professional financial consultants** and **tailored resources** based on their level or tier, to assist in achieving their financial goals

Product Solution

Gamified Rewards Dashboard

This is where we create the dashboard for gamification feature. It can provide users with a clear and visual representation of their progress and achievements within the app, allowing them to track their rewards and incentives.

How does it work?

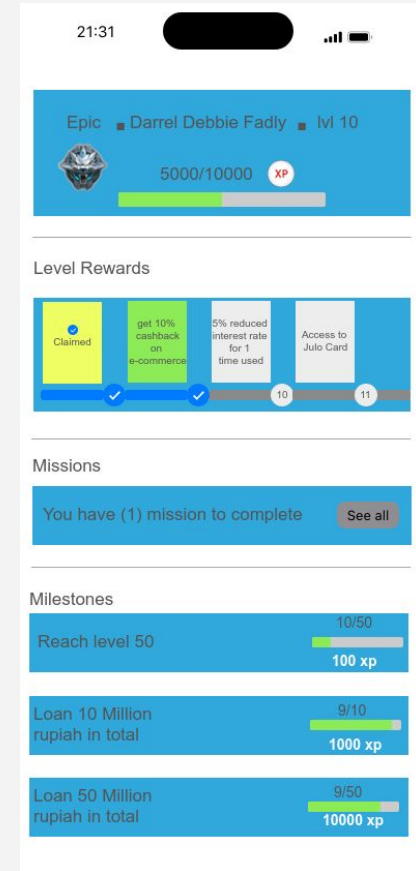

Streaks and Milestones – **Task Completion Rewards**: Users are encouraged to complete various tasks which, upon completion, will award them EXP to increase their levels. The higher the user's level, the more milestones and rewards they will be able to unlock.

What can we expect?

Users will be motivated to complete tasks to increase their levels and unlock rewards, leading to increased engagement and satisfaction with the app. The streaks and milestones system helps to make the experience more challenging and rewarding, keeping users interested and invested in the app.

What are the impact & benefit?

Users will be incentivized to interact more frequently with the app, and as they earn rewards and unlock milestones, they will feel a sense of accomplishment and satisfaction. This can lead to increased retention, improved user acquisition, and an overall growth in credit.

Product Solution

Mission Page

The mission page is a comprehensive solution that combines **education and marketing**, aimed at making the user experience **more engaging and fulfilling**.

How does it work?

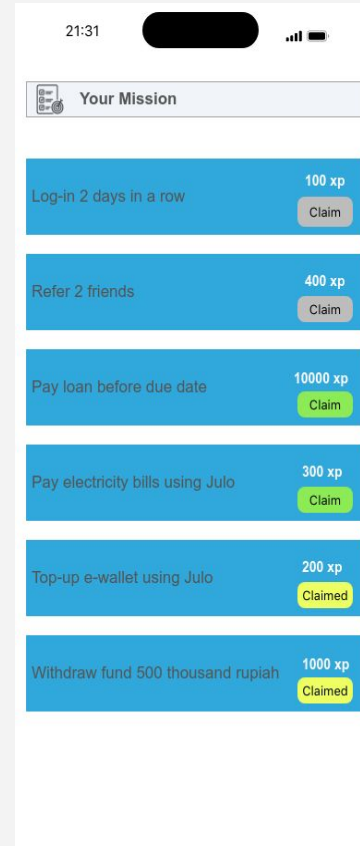

Daily and task-based mission. In terms of functionality, the mission page **presents tasks or challenges for users to complete** in order to earn rewards, such as EXP to increase their levels. As users progress and increase their levels, they **unlock more milestones and rewards**.

What can we expect?

The mission page in a gamification rewards program serves as an educational tool for users to **learn about existing and new products**. It also functions as a marketing tool to boost awareness, acquire new users and provide marketing benefits such as discounts and cashbacks as rewards.

What are the impact & benefit?

Increased user engagement and interaction, as well as the opportunity to educate users about products and services. This can lead to a **better understanding** and more informed usage **of the app and its features**, resulting in **increased customer satisfaction and loyalty**. Additionally, the referral program aspect of the mission page can lead to increased awareness of the app and the acquisition of new users, **expanding the app's reach and user base**.

Product Solution

Progress Tracker (Entry Point)

We are aiming to place the gamification feature prominently on the Julo homepage to **increase visibility and exposure** to users. This will increase the chances of users discovering and engaging with the feature.

How does it work?

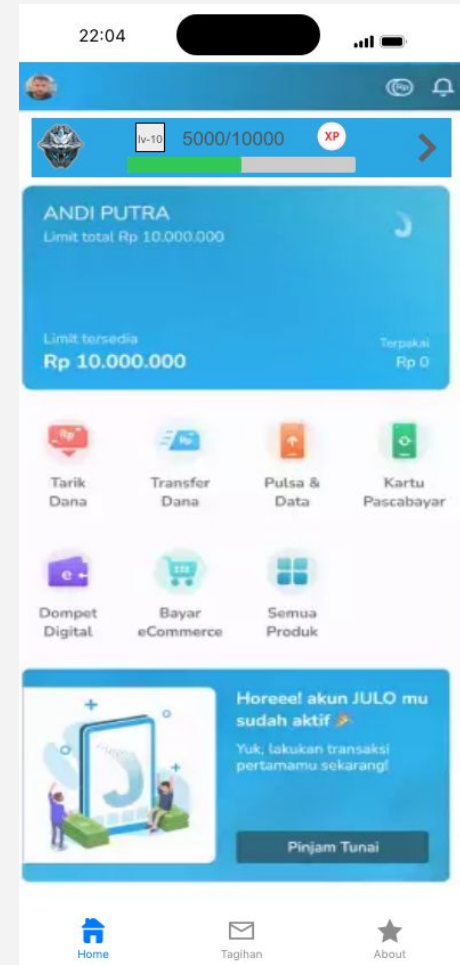

Allows users to see **a brief overview of their progress** and where they have left off. A quick access to the new product is provided, giving a summary of the user's experience while using the Julo app, by showing the user's total EXP, level, and progress bar.

What can we expect?

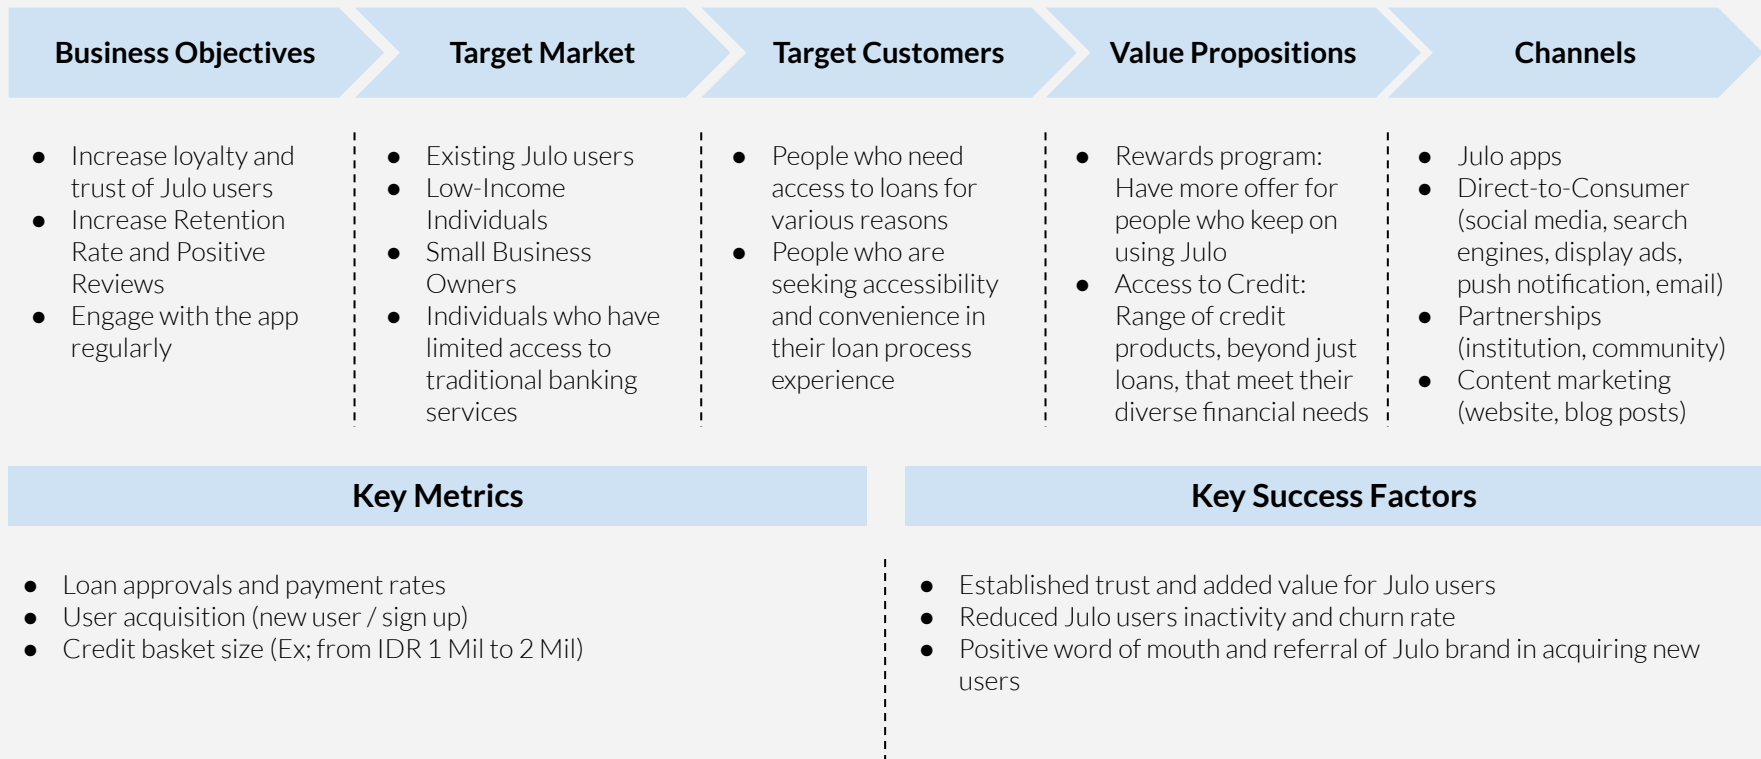

Users will be **encouraged to actively engage and interact** with the app by their motivation to increase their levels and earn more experiences, which come with added benefits and rewards.

What are the impact & benefit?

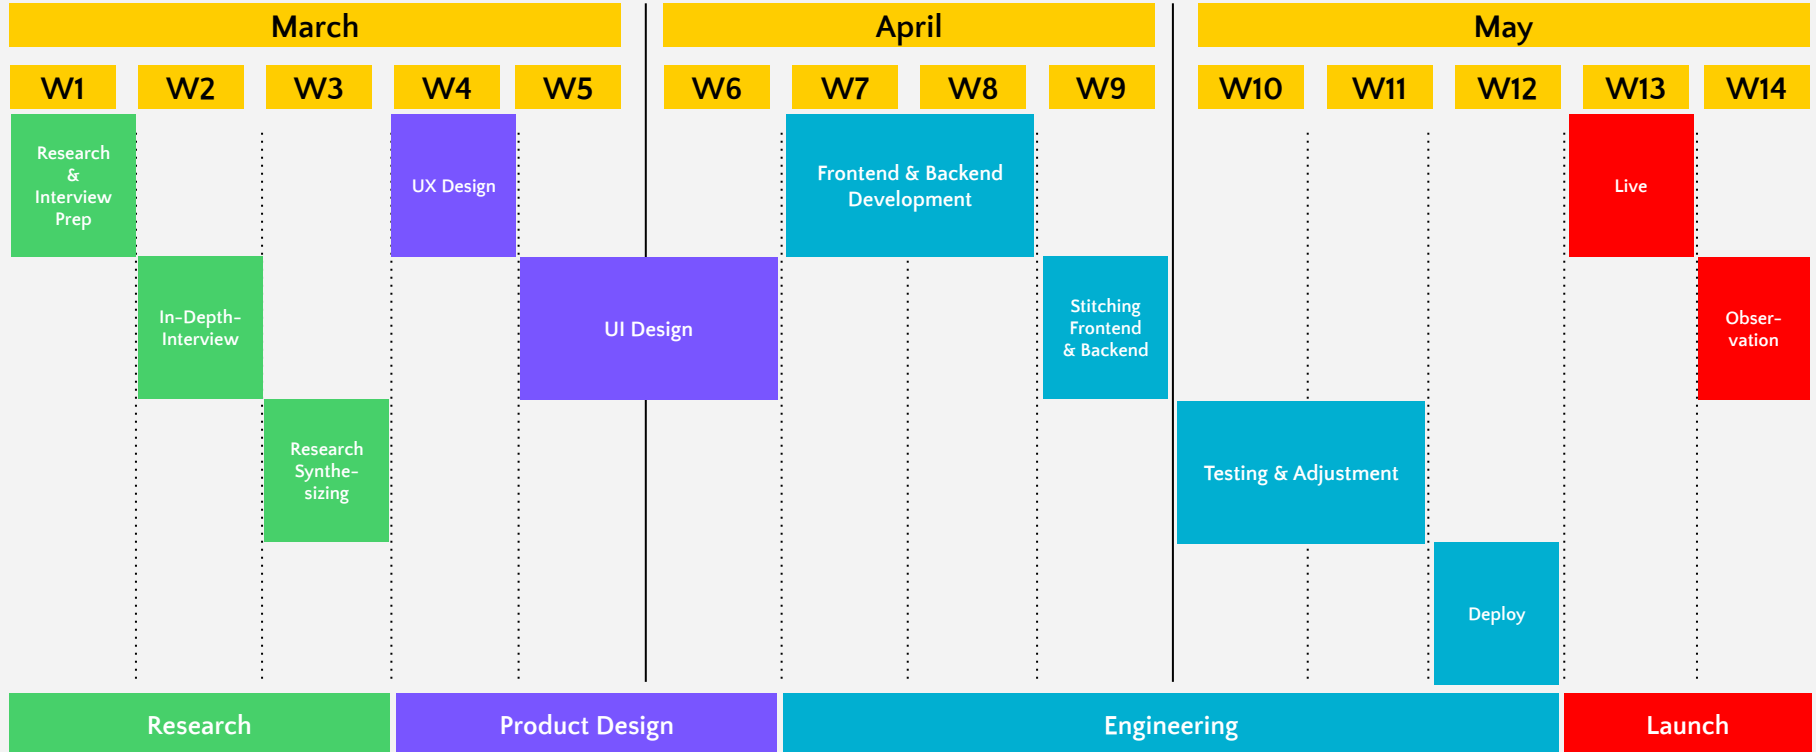

To give users a **different experience compared to other loan apps**. By portraying ourselves as a fun loan app rather than just a typical lending platform (terrifying with fear), to **better assist users in managing money** and **promote financial responsibility**. This approach not only creates a unique and enjoyable user experience, but also **demonstrates that Julo is more than just a lending app**, it is a comprehensive financial solution.

Go-To-Market

Timeline – Gamified Rewards Program

Summary

Our aim is to create a loan app that stands out by offering unique value propositions to users, with the goal of increasing user retention and engagement. To achieve this, we plan to incorporate the following:

- **Rewards Program with Gamification:** By incorporating a rewards program with gamification features, we aim to make users more engaged with the Julo app and aware of all its products and services. This approach is intended to spark users' interest and provide them with a sense of achievement.
- **Creating a "Beyond Loan" Value Proposition:** Offers more value and satisfaction to users beyond just loan services. This will include educating users about potential new products and services within the Julo app and improving user acquisition through deeper engagement.
- **Building Strong User Loyalty:** By fostering a sense of engagement and a positive image towards the company, we aim to increase user loyalty and attract new customers to use the Julo app.

The expected results of these efforts are:

- Increased user loyalty and new customer acquisition
- More frequent app usage and participation in value propositions
- Higher revenue and growth driven by higher retention and engagement

Thank You
