About RedDoorz

RedDoorz is the largest technology-based hospitality brand and continues to grow rapidly in Southeast Asia.

RedDoorz was founded in 2015 by a team with extensive experience in the online travel and hospitality industry and has grown to become a multinational company with operations in Indonesia, Singapore, Philippines and Vietnam. As part of the RedDoorz brand network, property owners can grow their business, increase revenue and profits, while carrying out their routine operations. The solutions presented by RedDoorz can help property owners to manage distribution, pricing, marketing, customer satisfaction, and technology by providing an end-to-end platform supported by advanced technology and digital infrastructure.

Vision: to make it easier for people to travel by providing affordable and reliable accommodation in all major cities and tourist destinations across the region.

Mission: to revolutionize the hospitality industry by transforming individual lodging providers into a hotel chain brand with standardized accommodation.

Business Model Canvas: RedDoorz

Team Restu Ibu

Key Partners

- Property Owner
- OTA

Key Activities

- daily operations,
- property consultation
- partner acquisition
- marketing & sales
- property branding

Key Resources

- Website
- Mobile app
- Property partners and franchise
- Customer database
- Employees
- Venture funding

Value Propositions

For Guest:

- A lot of property options (RedDoorz, RedDoorz Technology, SANS, UrbanView, and KoolKost)
- Affordable price
- Flexible payment options

For property Owner:

- Standardized facilities and services
- Full support from consultation, branding, to marketing.
- Automatic selling system supported with AI
- Integration with 20+ online travel agent system
- Various Partnership Schemes
- Dedicated Corporate Sales for promoting properties
- 24/7 Partner Support

Customer Relationships

Supply side:

- Commissions
- No booking, no pay
- Property Manager
- Channel Manager

Demand side:

- Support Center/Customer Service
- Real-time
- Accuracy

Channels

Transaction Channels

(App: most transactions can be managed through the app, including planning, booking, payment, etc.)

- hosts can manage things through the site/app.
- communication between host and guest through the app or other means.)
- RedDoorz app/website
- App store/Playstore

Marketing/Sales Channels

- Social Media: FB, IG, Tiktok, Twitter, LinkedIn
- Referrals get rewards

Customer Segments

Supply

- by geo-demographic
- by rental type and type of accommodation provided
 - hotel, kost house
 - tier: sans (unique & refreshing modern design, theme and personality vividly represented throughout its premise), RedPartners (partner hotels using the RedDoorz technology, that offer clean & comfortable stays in convenient locations), urbanview (natural themed urban hotel perfect for in-city staycation), RedDoorz (signature line of hotels offering comfortable stays at an affordable price, with a high quality room with a standard selection of amenities), koolkost (kost solution for student & young professionals).
- by location type and characteristics: urban, suburban, rural, exact location, proximity to amenities, etc.
- by motivation to host: maximisers, opportunity seekers

Demand

- by geo-demographic
- behavioral:
 - trip type: backpacking, business travel, leisure traveling, friends/family
 - property type (apartments/condos, hotel 3 star, resorts, capsule, villas, kos-kosan, desa wisata, hostel, cottage, hotel 4-5 star, camp)
 - accompanying guest (number & type: family, couple, etc)
- motivational-based: primary reasons for using RedDoorz
 - interest: types of activities that travellers engage in (esp leisure), particularly interesting for RedDoorz experiences/online experiences.

Cost Structure

- Platform (website and app) development and maintenance costs
- Renovation and branding cost
- IT infrastructure cost
- Marketing and advertising costs
- Marketing and advertising costs
- Employees salary costs
- Hotel Partners' commissions
- Legal cost
- Other operational and administrative cost

Revenue Streams

- Commissions
- Room reservation fee
- Ancillary sales
- Advertising
- Sponsor and partnership
- Insurance

Problem Discovery and Validation (In-depth Interview)

We conducted in-depth interviews to discover and validate problems faced by RedDoorz property partners.

Property Owner

We conducted interview with a non-brand property partner of RedDoorz. We found that the property owner mostly faced difficulty in terms of the app usability and operations.

Property Manager

To validate the previous findings, we also conducted interview with property manager. From the interview we intend to validate whether the problems also faced by other property partners.

Our findings from those in-depth interviews will be shown on the following empathy map.

Empathy Mapping (Property Owner Using Existing RedPartners App)

SAYS

Pricing

- I want to change the pricing..
- Why am i getting this low price for my property?
- Why is the next-door RedPartner's proper performing better than mine?

Reports

- How much revenue i got so far?
- I want simpler app than this to know the reports from RedDoorz.

Live Chat

- The live chat customer service is responsive.
- The live chat closes unexpectedly.

Feature Usability

- I rarely use the housekeeping feature.
- I don't use all the feature from the app.

System

- The reviews don't appear on the RedDoorz app because I only have less than 10 reviews.
- I can't contact customer to make sure their check-in time.
- I don't get notifications from the app in real-time.

Operations:

- Sometimes I forgot to change guest status to no-show for guests who don't show or cancelled the check-in.

THINKS

Pricing

- Sometimes I don't think the pricing from RedDoorz is fair and I have to adjust the price based on my own condition & preferences.

Reports

- I shouldn't share some of my confidential business reports to my staff.
- The report contains a lot of data that I don't use / need.

Feature Usability

- The current user interface of RedPartners app is too confusing.
- It's inefficient to contact the CS via live chat first to change the pricing.

DOES

Pricing

- Consult with property manager.
- Contact the CS via live chat.

FEELS

- Curious about what factors affect my property's pricing & performance.
- Overwhelmed with a lot of data that being provided.
- Worry that confidential data can be accessed by staff or other unauthorized personnel.
- A bit uncomfortable with UI design.
- Annoyed when the live chat window close unexpectedly while scrolling the other features.

User Persona

Putra Sujatmiko

A family man who has a property that has many rooms and he feels wasteful if his property room being left unproductive. He also wants to be successful in hospitality business. For him, family time is really important.

Demographic

Age : 40 years old
Location : Yogyakarta
Status : Married
Family : Lives with wife & 2 children

Digital Behavior

Internet 
Social Networks 
Messaging 

Goals

- Wants to get maximum profit from his property.
- Do not want to get involved in any marketing effort.
- Wants to have insightful discussion/meeting with his property manager.
- Able to change the pricing accommodation based on his own preference.
- Getting all reports and information about his property's performance in one app.

Frustrations

- Lack of hospitality business knowledge.
- Sometimes unsure about the price decision by RedDoorz.
- Still struggling to understand financial statement.
- Confused why competitors' performance can be better than his.
- Frustrated that some sensitive information can be accessed by employees.

Customer Journey Map

Team Restu Ibu

In RedPartners App					
User Goal	User wants to assign new guest	User wants to find the walk-in menu	User wants to input walk-in guest data details	User wants to submit price change request to CS	User check the new pricing.
	Open App	Open Dashboard	Walk-in (assign details)	Chat with CS	Process done
Activities	Login to RedPartners app	Open the RedPartners app dashboard	Open walk-in menu on dashboard, fill in guest data details to get booking id, get the guest booking ID.	Contact support team via live chat, give the booking ID to CS, request the price change, waiting for the confirmation from CS.	Support team approved the change and ask user to check the pricing.
Touch Point & Channels	Login page & homepage RedPartners app	Dashboard	Walk-in menu	Live chat	Live chat
Emotions	Neutral 	Neutral 	Worried 	Neutral 	Relieved 
Pain Points	- Slow loading - Manually input email and password (except users already save the credentials on the phone)	- Confused and overwhelmed with many options or feature on the app menu - Too many data shown on the dashboard	Wants to change the rates because user thinks the rate doesn't match the user's conditions & preferences	- Chat button overlap with hamburger menu - Manually input detail question/request - Need more waiting time to get response - Live chat often closes unexpectedly while they're opening other features	Need to wait for confirmation from CS before closing the chat or else users have to repeat the whole process

Opportunity Canvas for building GROW with RedDoorz App

Team Restu Ibu

Users and Customers

Gender: Male & female

Property Owner:

Age: 18-64 years old with SES A & B+

Background: college student, entrepreneur, housewife, ex hotel general manager

Motivations:

- don't want the property to be unproductive
- want to try the hospitality business
- indeed focus on the hospitality business.

Problems

- Having trouble changing the room rate to get the best deal
- Facing fraud cases by staff/PIC who changes guest status to no-show so that they can get the payment for themselves
- Need reports to track property performance, bookings, payments data, and also billing for RedDoorz partners in a single app
- Live chat window closes unexpectedly and force users to repeat the process of using the live chat

Solution Today

- Consult with property manager.
- Contact the CS via live chat.

Solution Ideas

- Competitor analysis reports to help them understand the reason behind the pricing.
- RedPartners-GROW with RedDoorz app integration.
- Backlog check in-check out.
- Revenue alarm/notification.
- Property performance reports (gross revenue, average occupancy rate, and average room rate, bookings and payment data, monthly billing for reddoorz partnership, forecast regarding past & potential revenue).
- Live chat feature with history so they don't need to retype the topic to CS.

What will users do to get value?

Property owner will actively using the GROW with RedDoorz app, getting for-owner-only reports especially marketing reports, gaining insight about marketing, business, financial, hospitality etc

Adoption Strategy

- E-mail
- Consultation with PM
- In-app feature information page

User Metrics

- NPS
- App Monthly Active Users
- Number of Rate Change Request (Tickets)

Business Challenge

- Decreasing of supply-side NPS (lower satisfaction)
- Probably will not continue the partnership contract (lower retention)
- Poor or ineffective communication (misinterpretation, distrust confusion)
- Lose to competitors

Budget

- Survey and interview cost
- Prototype cost
- User testing cost
- Scrum team working hours (2 FE, 2 BE, 1 UI)

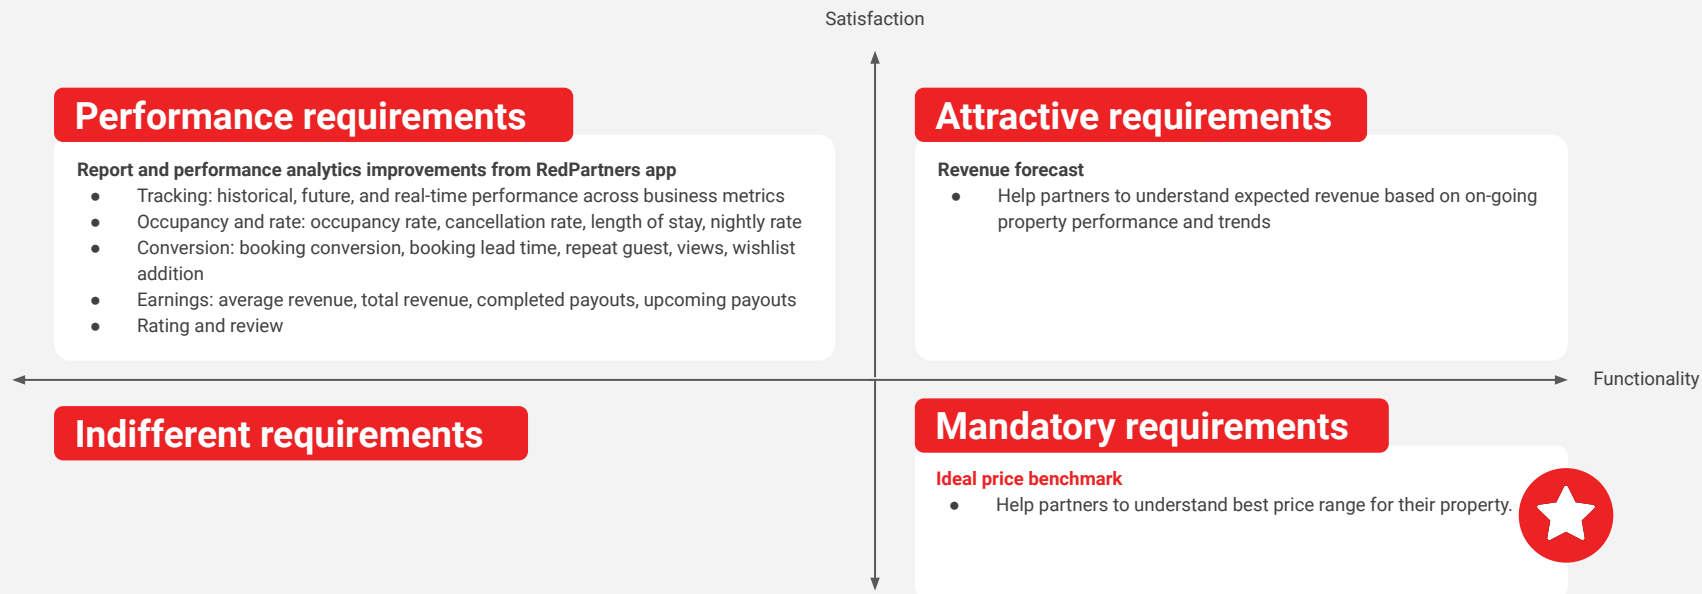

Business Impact

- NPS

Problem Prioritization to solve in GROW with RedDoorz App

Problem Statement	Reach	Impact		Confidence	Effort	RICE Score	Rank
	Score	User (60%)	Business (40%)	Score	Score		
		Score	Score				
How might we help users to tackle fraud cases so that they can reduce their chance of losing revenue?	1	2	1	4	2	3.2	3
How might we help users to be able to communicate with CS easily and hassle-free?	3	3	1	3	2	9.9	2
How might we facilitate users in giving additional consideration so that users can decide the best room rate for them?	4	3	2	4	4	10.4	1

Solution Prioritization - Kano Model

Feature to include:

Mandatory

Performance

Attractive

Proposed Prototype for GROW with RedDoorz App

Problem Explanation

- Users often try to change their room rate set by RedDoorz.
- To change the room rate, first have to fill in all details from walk-in order, get the booking ID, then get the CS to change the rate.
- The changes sometimes are dismissed, because they are not on the ideal range.

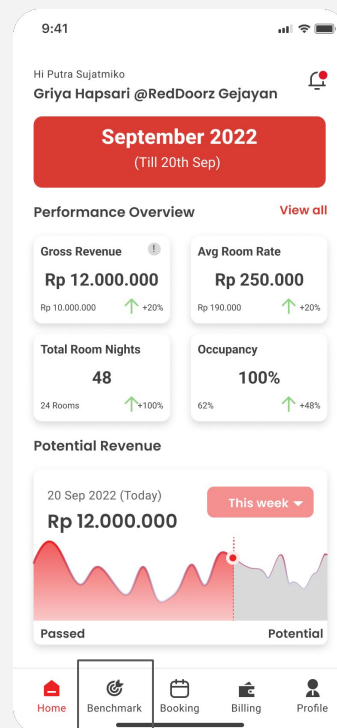

Solution Explanation

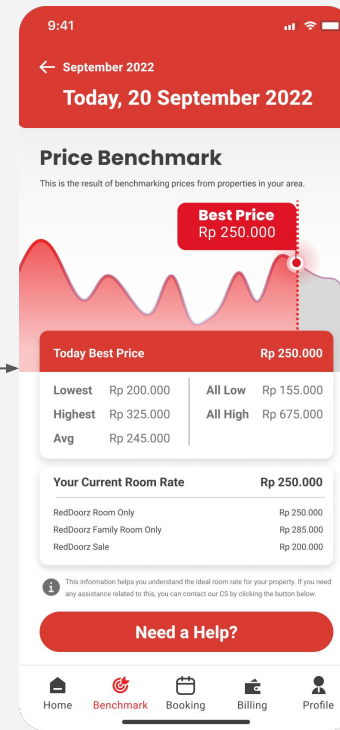

- Users can check the ideal room rate before deciding to change it.
- Users can change the room rate without booking ID.

The existing GROW with RedDoorz app is already contain performance analytics. The "Price Benchmark" is the feature we proposed to cater the need for property owners to understand pricing information. At the same time, it helps property owners to set the room rate based on RedDoorz calculation.

Dashboard page

Price Benchmark page

Proposed Prototype

Price Benchmark Page

Best Price Highlight

Show the best room rate for the property that RedDoorz recommended. The same price is automatically shown on the RedDoorz app.

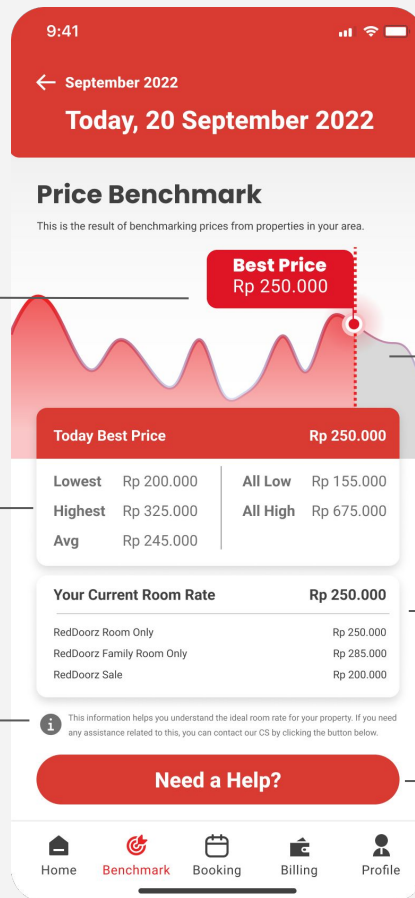

Price Benchmarking

Show complete information related to price benchmarking.

- **Lowest:** the lowest room rate a property can go.
- **Highest:** the highest room rate a property can go.
- **Avg:** the average room rate for a property.
- **All Low:** the lowest room rate recorded in history of a property.
- **All High:** the highest room rate recorded in history of a property.

Tooltip

Serve as a reminder that property owners can also submit a request to change the room rate of their property.

Room Rate Forecast

Show potential room rate for a property. The forecast is made by considering the seasonality and competition in the industry.

Room Rate Details

Show various room rate depending on the type of rooms available in a property.

CTA to Customer Service

Button that directly connected to customer service live chat. Property owners can use the feature change the room rate of their property with the help of RedDoorz team.

GROW with RedDoorz App MVP Roadmap

Go-to-Market Strategy

Business Objective	Target Market	Target Customer	Differentiated Offerings	Channels
• Increase RedPartners satisfaction (NPS) • Increase conversion rate • Increase revenue per RedPartner	RedPartners (property owners), 35-40+ years old	Frequent app user, actively monitor property performance	Provide ideal pricing benchmark based on real-time data, so that RedPartners can change their pricing strategically and increase their revenue per bookings.	• App • Landing page (website) • Social media • Press (mass media)
Marketing Strategies • In-app notification • New feature tutorial/walkthrough • Press release • Landing page/website for RedPartner • Business Developments marketing channels (blog)		Key Metric of this feature • The number of rate change (tickets) • The number of out-of-range rate (tickets). • Adoption rate for Benchmark feature • NPS		Success Metrics • Reduce the number of out-of-range rate change (tickets) by 15%. • Increase adoption rate of the new feature • Increase NPS by 10%

Press Release

Kedepankan Kepercayaan Mitra, RedDoorz Rilis Aplikasi GROW with RedDoorz

Menginjak 7 tahun beroperasi di Asia Tenggara, RedDoorz resmi meluncurkan GROW with RedDoorz aplikasi khusus mitra properti. Lewat aplikasi ini, mitra properti RedDoorz bisa memantau data performa unit bisnisnya secara real-time.

Rudianto Thong, Product Director RedDoorz, mengatakan aplikasi ini merupakan respons atas perubahan tren perilaku mitra pasca-pandemi. Di mana, mitra properti ingin lebih dilibatkan untuk meningkatkan performa bisnisnya.

“Kami percaya keterlibatan itu bisa dimulai ketika mitra dibekali data yang relevan,” ujar Rudi, Jumat (6/1).

Lewat data, kolaborasi mitra properti bersama RedDoorz bisa lebih terarah dan efisien. Sebab, apa yang dilakukan mengacu pada kondisi sesungguhnya.

“Kami rasa inisiatif ini akan mengawali tren kolaborasi bisnis yang berbasis data,” imbuh Rudi, “ini masih sangat jarang ditemui di Indonesia.”

Di dalam aplikasi GROW, mitra properti juga bisa mengetahui kisaran harga ideal sewa properti. Ketika diperlukan, mitra bisa mengubah harga sewa propertinya mengikuti kisaran harga yang tertera.

Dengan begitu, mitra juga diberikan kesempatan untuk meningkatkan angka okupansi dan pendapatan per unit propertinya. Terlebih ketika tingkat persaingan di industri budget hotel makin tinggi dengan adanya promo dan diskon.

“Ini adalah salah satu bentuk dukungan penuh kami kepada 3200+ mitra properti RedDoorz untuk mendapatkan deal terbaik,” ujar Rudi menutup sesi peluncuran GROW di Menara Standard Chartered, Jakarta.

Internal Communication Plan

Stakeholders	Way to educate	Channels
Business Development	- Give access to GROW with RedDoorz app prototype and make sure that the team understand how it works. The information can be used to influence potential partners to choose RedDoorz. - Align business and communication objectives - Align scope of campaign or initiatives	Email, Collaboration tool, Video Conference
Property Manager	- Online or offline pre-launch experience: establish facts and processes - Live-in person or virtual workshop experience: practice using facts, experience hands-on training, get feedback - Post-launch: Practice more complex scenarios and learn from real experience	Email, Collaboration tool, Video Conference
Customer Support / Technical Support	- Familiarize with features that might affect team's SOP. - Documentations to handle tickets and issues from the GROW with RedDoorz app.	Email, Collaboration tool, Video Conference

Summary

We found that most of property partners have some concerns related to **business performance** and **room rates** that set by RedDoorz.

To solve the problem, we identified several solutions like **(1) ideal rate benchmark;** **(2) report and performance analytics;** and **(3) revenue forecast**. Using the RICE and Kano model, we decided to go with building ideal rate benchmark.

Our go-to-market plan is we are targeting **property owners who frequently use the app** and **actively monitor their property performance**. To monitor the feature success, we will track some key metrics as follows:

- Rate change request (tickets)
- Adoption rate for Benchmark menu
- NPS

Appendix

Why does benchmarking feature matter?

Pricing transparency is considered important in business. The information might affect how the business works, especially in B2B, where trust are fundamental in establishing the relationship between the parties.

In the case of an end-to-end hospitality platform like RedDoorz, the role of price transparency is way more vital. Without the information, the property owners are left with no choice except to accept the room rate from RedDoorz.

Without any proper communication, the issue might undermine RedDoorz credibility. In extreme way, it might trigger property owners not to extend the partnership.

While this might look like an exaggeration, our problem validation showed that most problems faced by Property Managers are related to pricing.

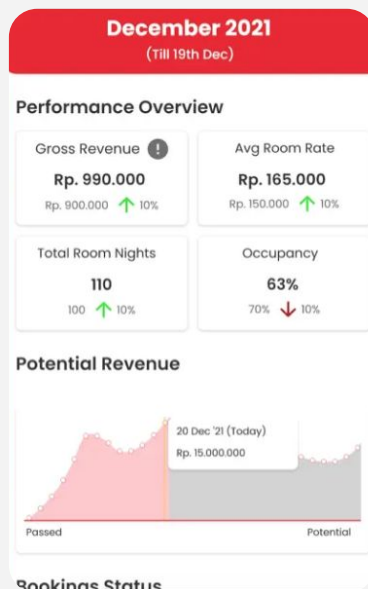

Interestingly, economic performance is not a direct consequence of trust, but rather an indirect consequence. When two parties work on their relationship, they increase their commitment to each other, cooperate, focus on the long-term, and reduce the uncertainty in the relationship. **The result of this is an easier interaction between the two parties, which then results in increased economic performance.**

(Rick Kamers, 2015)

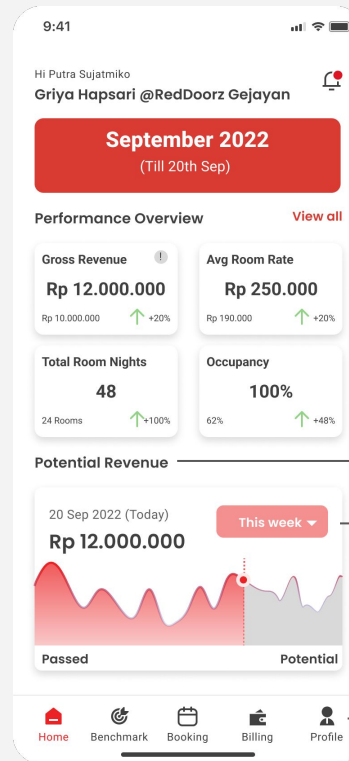

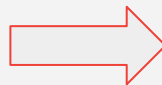

Appendix

Proposed Prototype Dashboard Page

BEFORE

<https://apps.apple.com/vn/app/grow-with-reddoorz/id1615939468>

AFTER

Notification

Contain important notification related to property performance, tickets, or other features.

Performance Overview

Property owners can check performance reports and analytics in complete form.

Potential Revenue

State potential revenue based on current transaction and trends.

Date order

Property owners can estimate potential revenue of their property based on give time range.

Navigation Menu

Help property owners to access important information related to their property.

THANK YOU
